SUMMARY

I am Shehan Harsha, a passionate Software Engineering undergraduate with hands-on experience in frontend development and responsive UI/UX design. I have contributed to team projects, including the Sri Lanka Dedicated Economic Center web and mobile application, and excel at creating user-friendly digital experiences. A quick learner and strong team player, I bring dedication, commitment, and creativity to every challenge while continuously improving my technical expertise.

EDUCATION

Higher National Diploma in Software Engineering	2024 - 2025
• National Institute of Business Management(NIBM)	
Diploma in Software Engineering	2023 - 2024
• National Institute of Business Management(NIBM)	
Computer Hardware Technician (NVQ Level 4)	2022
• Technical College Balapitiya	
G.C.E A/L	2020
• G/Aluthwala Maha Vidyalay,Aluthwala	
G.C.E O/L	2017
• G/Aluthwala Maha Vidyalay,Aluthwala	

PROJECTS AND WORK EXPERIENCE

Dedicated Economic Center Web & Mobile Application	2025
• Functionality: Enabled farmers to upload product details, provided customers/wholesalers real-time market data, ensured price transparency, streamlined buying/selling, and reduced post-harvest losses.	
• Technologies: Flutter (mobile), React.js (web), Node.js (backend), MySQL (database), Tailwind(CSS) .	
• Contribution: Developed responsive web interfaces, integrated real-time data, improved UI/UX, and collaborated on system integration across web, mobile, and backend.	
Rare Crop Home Agricultural Product Exchange System	2024
• Functionality: Built a web-based marketplace for agricultural products with product browsing, search, cart, and checkout features. Implemented user-friendly navigation for farmers and customers to connect directly.	
• Technologies: HTML, CSS, PHP	
• Contribution:	
Developed product display and cart management modules to enhance user experience.	
Designed responsive, intuitive interfaces ensuring accessibility across devices.	
Worked on checkout and order management flow, enabling smooth transactions.	
Collaborated on database integration for storing product, cart, and user details.	

- **Functionality:** A full-stack desktop application to manage products, customers, sales, payments, and inventory in a computer shop. Included modules for product management, billing, and reporting to streamline shop operations.
- **Technologies:** Java, JavaFX (frontend), Spring Boot (backend services), MySQL (database).
- **Contribution:** Designed and developed user-friendly JavaFX interfaces, integrated frontend with Spring Boot backend services, implemented CRUD operations for products, customers, and orders, developed payment and reporting features, and ensured reliable MySQL database connectivity.

- **Functionality:** IoT-based automated pet feeding system with real-time control and scheduling. Users can set feeding times, select portion sizes, and monitor feeding status through the mobile app.
- **Technologies:** Flutter (mobile app), Firebase (real-time database), NodeMCU, RTC module, servo motor, and IoT sensors.
- **Contribution:** Designed and implemented the hardware setup, integrated NodeMCU with Flutter app via Firebase for real-time control, developed scheduling and portion management features, and ensured seamless communication between mobile app and IoT devices.

- **Role & Responsibilities:** Repaired and installed CCTV devices, diagnosed and resolved computer hardware and software issues, and provided timely solutions to customers. Assisted as a salesman, supporting sales of computer hardware and related products.
- **Contribution:** Repaired and maintained computers and CCTV systems, resolved hardware/software issues efficiently, and supported sales operations to enhance customer satisfaction.

TECHNICAL SKILLS

- **Web Development:** HTML, CSS, JavaScript (ES6+), React.js, Node.js, Spring Boot, Tailwind CSS
- **Programming Languages:** C++, Java, Dart, JavaScript, PHP, C, C#
- **Database Systems:** MySQL, MongoDB, Firebase, SQLite, Oracle
- **Mobile Development:** Flutter, Kotlin (Android)
- **Hardware & IT Support:** Computer repair and troubleshooting, hardware installation, CCTV installation and maintenance, software troubleshooting, system diagnostics
- **Development Tools:** Git, GitHub, GitHub Actions, Postman, Figma, VS Code, IntelliJ IDEA, Android Studio, Linux/Unix, Arduino, Anaconda, FireBase
- **Data Science & Machine Learning:** Jupyter Notebooks
- **Project Management:** Agile Methodologies

SOFT SKILLS

- **Problem-Solving:** Proven ability to analyze complex issues and implement efficient solutions, particularly in software engineering, IoT, and mobile app development.
- **Teamwork:** Collaborated effectively on group projects, ensuring smooth coordination, task sharing, and on-time delivery.
- **Leadership:** Guided software and database development projects, motivating team members to achieve goals and maintain quality standards.
- **Communication:** Conveyed technical concepts clearly to both technical and non-technical audiences, improving collaboration.
